Hard Skills

- | | |
|--|---|
| Programming Paradigm <ul style="list-style-type: none">OOP, Functional programming | Frameworks <ul style="list-style-type: none">Spring Boots, Gin, Vue.js, Nuxt.js, Next.js |
| Languages <ul style="list-style-type: none">Java, Kotlin, JavaScript, Typescript, HTML, SQL, Go | CSS & UI Frameworks <ul style="list-style-type: none">Tailwind, Bootstrap, MUI, Ant Design |
| Database Management <ul style="list-style-type: none">MySQL, MongoDB, SQL Server Management Studio, DBeaver | Testing <ul style="list-style-type: none">Unit test, Mockito, JUnit, Cypress, E2E |
| DevOps <ul style="list-style-type: none">GitHub Action, CLI, Docker | Other Skills <ul style="list-style-type: none">Agile/Scrum, RESTful APIs, Swagger |

Work Experience

-  **Accenture** | FEB 2026-Current
Back-End Developer
 - I worked on the BizOne project at TTB. The system was developed using Kotlin with Spring Boot.
 - Developed a Kotlin encryption library for securing sensitive data at rest using symmetric and asymmetric encryption
-  **AIS** |  **CT Assigned by AIS** | JUN 2025-JAN 2026
Back-End Developer
 - Programmer Developed and optimized API endpoints using Java and Spring Boot.
 - Develop, enhance, and maintain backend components while ensuring code quality, security, and performance.
-  **Siam Commercial Bank** | JAN- MAY 2025 (Part-time)
Back-End Developer
 - Developed and optimized API endpoints for international money transfers using Java and Spring Boot, and writing unit tests with JUnit and Mockito framework.
-  **Ifrosoft** | JUL- AUG 2024, MAR-JUN 2025 (Contract)
Software developer
 - Developed a system for tracking employee check-ins and check-outs, as well as calculating daily earnings, working hours, and total work time.
-  **The Brooker Group PCL** | JAN - JUN 2024 (Internship)
Front-End developer
 - Worked on the front-end with Vue.js, back-end with Go, and testing with Cypress, focusing on AI-based image processing for data analysis.

Project Experience

-  **Hackcenture Finalist** | 2026
AI Agent (n8n, Google ADK)
 - Automated customer data verification using AI agents to improve speed and accuracy.
 - Designed and developed systems to reduce manual workload for clients through process automation and streamlined business operations.
